

BPO Service Desk Standard Operating Procedure

Category: BPO

Our BPO service desk handles inbound support requests across voice, email, and chat channels, with standard priority tickets resolved within 24 business hours and urgent priority tickets carrying a 4-hour resolution target.

Support is currently available in English and Hindi, with regional language add-ons available for enterprise clients requiring broader language coverage across their customer base.

Tickets that cannot be resolved at first contact are escalated via the client portal or by email to our escalations team, which reviews and responds to escalated tickets within 4 business hours of receipt.

Quality assurance reviews are conducted weekly across a sample of resolved tickets to ensure resolution quality and adherence to client-specific service scripts and compliance requirements.
